

3 key strategies for profitable chemicals operations

Ready to catalyze smart growth throughout the chemicals lifecycle?
Meet your profitability and sustainability goals at once with industrial intelligence.

Operate reliably

Insight: **47%** of executives in the chemicals sector report lifecycle visibility as a major challenge.¹

Solution: Real-time data infrastructure, holistic operations control, and edge-to-enterprise visualization give you the power to improve decision-making, safety, consistency, and profitability—and reach peak operational reliability.

Maximize performance

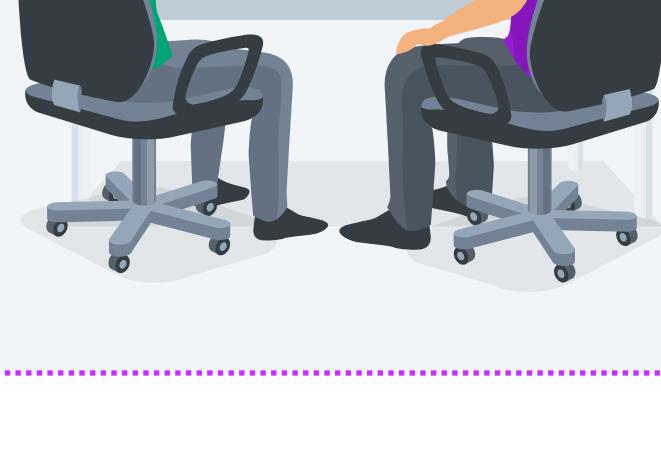

Insight: **50%** of chemicals industry leaders identify asset reliability and efficiency as top priorities.²

Solution: What do you get when you optimize production, eliminate unplanned asset downtime, enable visibility into your asset performance, and align your asset, operational, and sustainability KPIs? You get a winning formula for success.

Engineer faster and more efficiently

Insight: Only **19%** of companies fully utilize digital engineering solutions, missing opportunities to reduce project risks.¹

Solution: Whether greenfield or brownfield, large or small, it doesn't matter what type of project you're undertaking. Faster, more collaborative engineering tools de-risk projects and protect your investment from the outset.
